**DETAILED ACTION**

***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

the claimed invention is directed to non-statutory subject matter. The limitations of the claims 49-50 are directed to a program product that situated on a signal-bearing medium; however such limitation lacks practical application. This is because, the signal bearing medium bearing a program code, as claimed, cannot and does not include the hardware necessary to realize the functionality to be realized with the computer in order to yield practical application.

***Allowable Subject Matter***

2. The examiner finds the limitations of the claims 1-28 allowable over the prior art of record. The claimed combinations of having multiple connections between a peripheral device and a computer in combination with the rest of the limitations of independent claims 1, 17, 21, 24, 42 and 46 are not taught by the prior art of record. In addition, the further limiting claims 2-16, 18-20, 22-23, 25-41, 43-45 & 47-48 are similarly allowable over the prior art of record.
